### ORGANIC WINES:

### THE VINEYARD

Our expert will accompany and introduce you to the principles of organic vine cultivation in the vineyard using an interesting approach not focused on too many scientific details so that it can be fun even for kids and novices. A smart trip through nature, wine, history, science and folklore.

### THE WINE-CELLAR

This is the real green heart of the company. Pomaio's wine cellar was built according to the principles of ECO-Green Architecture using the same method adopted by the Romans and the Etruscans. Due to these features the building was selected as one of the 13 most beautiful design wine cellars of Tuscany by Toscana Wine Architecture. This phase of the tour will open a door to the vinification techniques and everything that is related to the production of organic wines.

### THE TASTING

Combined with our organic quality wines you will experience great craft ingredients coming from local farmers. While the wines express their bouquet there will be a brief introduction to the sommelier's world with special attention to those details and tips that can be reused at home with friends while proposing wines to the guests.

## WineTaste&Tour
